

From Director

Started from 2001, CBRC has become the biggest bioinformatics research institute in Japan. More than one hundred researchers or trainees are working together here in AIST Tokyo Waterfront site.

This is the third release of the English version of CBRC Newsletter. We wish to deliver latest information on CBRC's research activities and outcomes regularly to you.

Current issue includes research projects on CBRC(p.3), CBRC's contribution to the *Aspergillus* genome analysis (p.6), research software products e.g. POODLE (p.8), SHOE (p.9) and more.

Your comments and suggestions are highly welcomed.

I hope you enjoy this issue of CBRC newsletter.
